

Engineering simplicity into kitchen ventilation systems.

Heath Barbato, Executive Chef
for Delaware North at Lambeau Field

When building out a commercial kitchen you don't need complexity. You need answers. At Accurex®, we do the hard work for you. Everything we do – from engineering to after-market service – is designed to make it easy for you to succeed.

We are a Greenheck Group Company, a leading manufacturer of commercial air movement and control equipment. You can rest easy knowing you're sourcing a complete kitchen ventilation system from one trusted provider.

We're here to focus on creating a building that breathes and functions the way you expect. We offer a comprehensive line of product styles, sizes, features and accessories to give you the flexibility to meet your functional and aesthetic requirements.

WHAT SETS US APART?

EXPERTISE

As part of the Greenheck Group, we have more than 74 years of experience engineering and manufacturing kitchen ventilation products to simplify and clarify even the most complex issues and kitchen configurations you face.

TRUST

With 100% transparency, we make it easy for you to succeed with a straightforward commitment to responsiveness, accountability and integrity in all we do.

QUALITY

We engineer and manufacture our products to last, backed by robust warranties so you can count on them to work for years to come.

FLEXIBILITY

As a Greenheck Group company, we provide the industry's broadest offering of kitchen ventilation products, delivering the best solution to meet your needs and goals.

USABILITY

Our products are easy-to-operate and simple-to-maintain allowing you to focus your attention on delighting your customers.

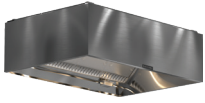

SERVICE & SUPPORT

Accurex technical support team of factory application engineers are available 24/7. Our nationwide network of over 2,000 factory authorized service providers are available for on-site assistance. We also partner with Parts Town for quick parts replacement needs.

Simplicity in every system.

When it comes to kitchen ventilation systems, we never stop improving. Through extensive research and design, we create products that have higher efficiencies with lower installation and operating costs. And everything we create is built to be fully integrated throughout your kitchen as well as easy to install, operate and maintain. Now that's worry-free simplicity, day in and day out.

EXHAUST HOODS

Accurex® offers a full line of UL Listed type 1 and type 2 commercial kitchen hoods – configured to fit your kitchen space and overall needs, whether that is a standard hood or a self-cleaning hood that removes the hassle of manual filter cleaning.

FILTRATION

Reducing duct cleanings-eliminating rooftop grease problems and hitting air emissions standards are all made easy with our industry-leading hood filters. Our innovative designs provide superior performance with lower operating costs.

FIRE READY RESIDENTIAL RANGE HOOD

Perfect for a growing not-for-profit industry focused on life safety, our residential-style hood features a sleek design and touchscreen control and offers similar protection as a type 1 hood with a smaller footprint, lower cost and with built-in UL 300A fire suppression.

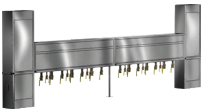

ACCUREX CONTROLS

Our control systems feature intuitive full-color touchscreen technology and simplified tool-free interface mounting with fewer parts and less wiring for easy installation and streamlined operation. Experience energy and cost savings with industry-leading turndown capabilities, high-efficiency motors and heat sensors for total comfort throughout your operation.

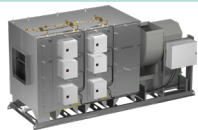

FIRE SUPPRESSION SYSTEMS

A pre-engineered fire suppression system is the first defense against a devastating restaurant fire. Accurex has a variety of factory pre-piped kitchen fire protection systems available.

UTILITY DISTRIBUTION SYSTEMS

Fully configurable for your kitchen layout, factory tested and UL Listed, our utility distribution systems provide quick and easy connections from your site utilities to your appliances. Save installation time and allow for future relocation of appliances, without expensive modifications.

POLLUTION CONTROL UNITS

Accurex sets the standard in grease and smoke removal with high-performance pollution control units offering a full line of mechanically filtered and electrostatic precipitator units that are both listed to the UL 8782 standard.

EXHAUST FANS

Our broad and flexible exhaust fan offering provides leak-proof construction with welded fan housings and greater efficiencies that allow for smaller fans and lower costs. Our Greenheck Vari-Green® electronically commutated motor can provide additional electrical savings 20-70% over traditional motors and is virtually maintenance free with no belts or bearings to replace.

MAKE-UP AIR UNITS

We offer the widest range of make-up air products including untempered, heated and/or cooled units. Accurex leads the industry in airflow reduction for tempered units, with an optimized cooling system design and a bypass patented damper for industry-leading direct-gas heat. Installation is made simple with features like single point power and a compact, integral design.

PACKAGED ROOFTOP UNITS | DOAS

Finding the best comfort solution is important, particularly in applications such as open concept, food halls, small footprint buildings, or high occupancy situations where patron comfort may depend on make-up air tempering choices. Look to our dedicated outdoor air systems to provide fully conditioned (heat, cool, and dehumidify) outdoor air at the precise level you need.

GREASE DUCT

We've partnered with Jeremias to offer prefabricated UL listed grease duct, factory-built and engineered specifically for commercial kitchens, bringing faster installation and increased safety when integrating with Accurex commercial kitchen ventilation systems.
